

ASHUTOSH SHARMA

INFRASTRUCTURE ENGINEER

Email: ashusharma181996@gmail.com | Phone: +91-8602228417 | Location: Navi Mumbai, Maharashtra, India

LinkedIn: www.linkedin.com/in/ashutosh-sharma-5034b5145 | GitHub: github.com/Ashu1896

PROFESSIONAL SUMMARY

Infrastructure Engineer with 5+ years of experience managing robust systems and fleets of 2000+ servers (RHEL/Ubuntu, HP-UX, AIX, Nutanix hypervisors). Proven expert in Infrastructure Engineering, executing OS upgrade operations, standardizing server deployments, designing high-availability storage architectures (LVM/RAID), and configuring high-uptime operations. Skilled in hardware management, storage administration, and infrastructure-as-code automation using Ansible and Terraform.

TECHNICAL SKILLS

Linux System Administration: RHEL 6/7/8/9, Ubuntu 18/20/22, Kernel Tuning, LVM, RAID, systemd, iptables/firewalld, NFS/SAMBA, DNS, DHCP

Cloud Architecture & Operations: Cloud Architecture, High Availability Design, Disaster Recovery, Multi-Region Deployments, Hybrid Cloud

Automation & Infrastructure as Code: Terraform, Ansible, Bash Scripting, Python, CloudFormation, Jenkins, Git

Security & Compliance Hardening: IAM Policies, PCI DSS, CIS Benchmarks, Security Hardening, SSL/TLS, PAM, Vulnerability Patching, Audit Logging

Middleware & Web Servers: Apache HTTPD, Nginx, Apache Tomcat, JBoss

Databases & Web Middleware: MySQL, RDS (AWS)

PROFESSIONAL EXPERIENCE

Senior Software Engineer

November 2025 - Present

Quality Kiosk Technologies -- Navi Mumbai, India

- Architecting and managing AWS cloud infrastructure including EC2, S3, IAM, CloudWatch, and RDS for enterprise clients.
- Implementing observability solutions using Dynatrace and AWS CloudWatch for real-time application and infrastructure monitoring.
- Driving automation initiatives using Ansible and Terraform to streamline cloud provisioning and configuration management.
- Collaborating with development teams to integrate monitoring into CI/CD pipelines for shift-left observability.

Senior Analyst - Linux & Cloud Infrastructure

March 2022 - August 2025

Capgemini -- Pune, India

- Administered 2000+ RHEL/Ubuntu production servers (50+ HP-UX, 30+ AIX, 28 Nutanix) achieving 99.95% uptime SLA.
- Led OS migration and upgrade project from RHEL 6 to RHEL 7 for 1000+ servers with zero downtime using Ansible and Bash scripting.
- Optimized system performance through kernel parameter tuning, resulting in 25% improvement in application response times.
- Reduced storage costs 30% by implementing automated log rotation and archival policies via Bash scripts and cron jobs.
- Managed AWS cloud resources (EC2, S3, IAM, CloudWatch, RDS) supporting financial services and insurance core systems.
- Hardened 200+ Linux servers per CIS benchmarks and PCI DSS requirements, achieving zero critical findings in security audits.
- Developed 50+ Ansible playbooks automating server provisioning and configuration, reducing deployment time from 4 hours to 30 minutes (75% reduction).
- Created Python-based monitoring scripts for anomaly detection, preventing 20+ potential outages monthly.
- Built self-healing scripts for common infrastructure issues, reducing ticket volume by 45% and saving 20 hours weekly.
- Reduced operational overhead 40% through comprehensive automation of daily health checks, reporting, and

configuration management.

- Engineered Bash script automating traffic failover between primary and DR sites, reducing RTO from 2 hours to 5 minutes.
- Deployed Dynatrace OneAgent across Linux infrastructure providing real-time visibility into system and application metrics.

Application Performance Monitoring Analyst

February 2021 - October 2021

Byju's -- Remote

- Monitored application performance and user enrolment processes for a high-traffic educational platform.
- Tracked daily application metrics and user activity patterns using web-based monitoring and APM tools.
- Generated automated HTML reports with student information and academic data, improving stakeholder visibility.

Technical Support Executive - Identity & Access

November 2019 - July 2020

Conneqt Business Solutions (Client: Tata Motors) -- Pune, India

- Managed user access provisioning and identity management through Additas ticketing system.
- Implemented role-based access control policies and coordinated approval workflows with department heads.
- Performed end-to-end user lifecycle management including account creation, modification, and deactivation.

CERTIFICATIONS

- HashiCorp Certified: Terraform Associate (HashiCorp) -- 2024
- ITIL Foundation v4 (AXELOS) -- 2023
- AWS Certified Solutions Architect - Associate (Amazon Web Services) -- 2026 [In Progress]
- Dynatrace Associate (Dynatrace) -- 2026
- Red Hat Certified System Administrator (RHCSA) (Red Hat) -- 2026 [In Progress]

EDUCATION

- Bachelor of Engineering in Computer Science - Gyan Ganga Institute Of Technology & Sciences (2019)
- Score: 7.51 CGPA
