PROFESSIONAL SUMMARY

Platform Engineer with a passion for building robust, self-service developer platforms and standardizing Kubernetes/cloud-native infrastructure. Over 5+ years of technical experience automating environment provisioning with Terraform and configuration management with Ansible. Focused on Platform Engineering, improving developer velocity, enforcing centralized compliance policies, containerizing complex enterprise workloads (Docker), and integrating shift-left observability tools into CI/CD pipelines.

TECHNICAL SKILLS

Containers & DevOps Pipelines: Docker, Kubernetes, Jenkins, Git, GitLab, GitHub, Infrastructure as Code, Configuration Management

Automation & Infrastructure as Code: Terraform, Ansible, Bash Scripting, Python, CloudFormation, Jenkins, Git

AWS Cloud Services: EC2, S3, IAM, CloudWatch, RDS, VPC, ELB, Auto Scaling, Lambda, ECS, Route 53, SNS, SQS, CloudTrail, Systems Manager

Linux System Administration: RHEL 6/7/8/9, Ubuntu 18/20/22, Kernel Tuning, LVM, RAID, systemd, iptables/firewalld, NFS/SAMBA, DNS, DHCP

Monitoring & Observability: AWS CloudWatch, Dynatrace, Datadog, Nagios, Prometheus, Grafana, APM, RUM, Synthetic Monitoring

Security & Compliance Hardening: IAM Policies, PCI DSS, CIS Benchmarks, Security Hardening, SSL/TLS, PAM, Vulnerability Patching, Audit Logging

PROFESSIONAL EXPERIENCE

Senior Software Engineer

November 2025 - Present

Quality Kiosk Technologies -- Navi Mumbai, India

- Driving automation initiatives using Ansible and Terraform to streamline cloud provisioning and configuration management.
- Architecting and managing AWS cloud infrastructure including EC2, S3, IAM, CloudWatch, and RDS for enterprise clients.
- Collaborating with development teams to integrate monitoring into CI/CD pipelines for shift-left observability.
- Implementing observability solutions using Dynatrace and AWS CloudWatch for real-time application and infrastructure monitoring.

Senior Analyst - Linux & Cloud Infrastructure

March 2022 - August 2025

Capgemini -- Pune, India

- Led OS migration and upgrade project from RHEL 6 to RHEL 7 for 1000+ servers with zero downtime using Ansible and Bash scripting.
- Developed 50+ Ansible playbooks automating server provisioning and configuration, reducing deployment time from 4 hours to 30 minutes (75% reduction).
- Reduced operational overhead 40% through comprehensive automation of daily health checks, reporting, and configuration management.
- Implemented centralized configuration management using Ansible, ensuring 100% compliance with security policies.
- Managed AWS cloud resources (EC2, S3, IAM, CloudWatch, RDS) supporting financial services and insurance core systems.
- Administered 2000+ RHEL/Ubuntu production servers (50+ HP-UX, 30+ AIX, 28 Nutanix) achieving 99.95% uptime SLA.
- Optimized system performance through kernel parameter tuning, resulting in 25% improvement in application response times.
- Reduced storage costs 30% by implementing automated log rotation and archival policies via Bash scripts and cron jobs.

- Created Python-based monitoring scripts for anomaly detection, preventing 20+ potential outages monthly.
- Built self-healing scripts for common infrastructure issues, reducing ticket volume by 45% and saving 20 hours weekly.
- Engineered Bash script automating traffic failover between primary and DR sites, reducing RTO from 2 hours to 5 minutes.
- Deployed Dynatrace OneAgent across Linux infrastructure providing real-time visibility into system and application metrics.

Application Performance Monitoring Analyst

February 2021 - October 2021

Byju's -- Remote

- Monitored application performance and user enrolment processes for a high-traffic educational platform.
- Tracked daily application metrics and user activity patterns using web-based monitoring and APM tools.
- Generated automated HTML reports with student information and academic data, improving stakeholder visibility.

Technical Support Executive - Identity & Access

November 2019 - July 2020

Conneqt Business Solutions (Client: Tata Motors) -- Pune, India

- Managed user access provisioning and identity management through Additas ticketing system.
- Implemented role-based access control policies and coordinated approval workflows with department heads.
- Performed end-to-end user lifecycle management including account creation, modification, and deactivation.

CERTIFICATIONS

- HashiCorp Certified: Terraform Associate (HashiCorp) -- 2024
- ITIL Foundation v4 (AXELOS) -- 2023
- AWS Certified Solutions Architect - Associate (Amazon Web Services) -- 2026 [In Progress]
- Dynatrace Associate (Dynatrace) -- 2026
- Red Hat Certified System Administrator (RHCSA) (Red Hat) -- 2026 [In Progress]

EDUCATION

- Bachelor of Engineering in Computer Science - Gyan Ganga Institute Of Technology & Sciences (2019)
- Score: 7.51 CGPA
