

# ASHUTOSH SHARMA

## SENIOR LINUX ADMINISTRATOR

Email: ashusharma181996@gmail.com | Phone: +91-8602228417 | Location: Navi Mumbai, Maharashtra, India

LinkedIn: [www.linkedin.com/in/ashutosh-sharma-5034b5145](https://www.linkedin.com/in/ashutosh-sharma-5034b5145) | GitHub: [github.com/Ashu1896](https://github.com/Ashu1896)

## PROFESSIONAL SUMMARY

Seasoned Senior Linux Administrator with 5+ years of deep technical expertise architecting, maintaining, and automating large-scale enterprise RHEL infrastructure. Proven leader in executing complex OS migration projects migrating 1000+ servers with zero downtime. Expert in kernel parameter tuning (improving latency by 25%), CIS security hardening, high availability design, LVM storage orchestration, and advanced configuration management via Ansible. Strong track record of troubleshooting and maintaining 99.95% SLA across critical operations.

## TECHNICAL SKILLS

**Linux System Administration:** RHEL 6/7/8/9, Ubuntu 18/20/22, Kernel Tuning, LVM, RAID, systemd, iptables/firewalld, NFS/SAMBA, DNS, DHCP

**Security & Compliance Hardening:** IAM Policies, PCI DSS, CIS Benchmarks, Security Hardening, SSL/TLS, PAM, Vulnerability Patching, Audit Logging

**Automation & Infrastructure as Code:** Terraform, Ansible, Bash Scripting, Python, CloudFormation, Jenkins, Git

**Monitoring & Observability:** AWS CloudWatch, Dynatrace, Datadog, Nagios, Prometheus, Grafana, APM, RUM, Synthetic Monitoring

**Middleware & Web Servers:** Apache HTTPD, Nginx, Apache Tomcat, JBoss

**Databases & Web Middleware:** MySQL, RDS (AWS)

## PROFESSIONAL EXPERIENCE

### Senior Software Engineer

November 2025 - Present

#### Quality Kiosk Technologies -- Navi Mumbai, India

- Architecting and managing AWS cloud infrastructure including EC2, S3, IAM, CloudWatch, and RDS for enterprise clients.
- Driving automation initiatives using Ansible and Terraform to streamline cloud provisioning and configuration management.
- Implementing observability solutions using Dynatrace and AWS CloudWatch for real-time application and infrastructure monitoring.
- Collaborating with development teams to integrate monitoring into CI/CD pipelines for shift-left observability.

### Senior Analyst - Linux & Cloud Infrastructure

March 2022 - August 2025

#### Capgemini -- Pune, India

- Administered 2000+ RHEL/Ubuntu production servers (50+ HP-UX, 30+ AIX, 28 Nutanix) achieving 99.95% uptime SLA.
- Led OS migration and upgrade project from RHEL 6 to RHEL 7 for 1000+ servers with zero downtime using Ansible and Bash scripting.
- Optimized system performance through kernel parameter tuning, resulting in 25% improvement in application response times.
- Hardened 200+ Linux servers per CIS benchmarks and PCI DSS requirements, achieving zero critical findings in security audits.
- Managed AWS cloud resources (EC2, S3, IAM, CloudWatch, RDS) supporting financial services and insurance core systems.
- Reduced storage costs 30% by implementing automated log rotation and archival policies via Bash scripts and cron jobs.
- Developed 50+ Ansible playbooks automating server provisioning and configuration, reducing deployment time from 4 hours to 30 minutes (75% reduction).
- Reduced operational overhead 40% through comprehensive automation of daily health checks, reporting, and configuration management.
- Implemented centralized configuration management using Ansible, ensuring 100% compliance with security policies.

- Created Python-based monitoring scripts for anomaly detection, preventing 20+ potential outages monthly.
- Built self-healing scripts for common infrastructure issues, reducing ticket volume by 45% and saving 20 hours weekly.
- Engineered Bash script automating traffic failover between primary and DR sites, reducing RTO from 2 hours to 5 minutes.

### **Application Performance Monitoring Analyst**

*February 2021 - October 2021*

#### **Byju's -- Remote**

- Monitored application performance and user enrolment processes for a high-traffic educational platform.
- Tracked daily application metrics and user activity patterns using web-based monitoring and APM tools.
- Generated automated HTML reports with student information and academic data, improving stakeholder visibility.

### **Technical Support Executive - Identity & Access**

*November 2019 - July 2020*

#### **Conneqt Business Solutions (Client: Tata Motors) -- Pune, India**

- Managed user access provisioning and identity management through Additas ticketing system.
- Implemented role-based access control policies and coordinated approval workflows with department heads.
- Performed end-to-end user lifecycle management including account creation, modification, and deactivation.

## **CERTIFICATIONS**

---

- HashiCorp Certified: Terraform Associate (HashiCorp) -- 2024
- ITIL Foundation v4 (AXELOS) -- 2023
- AWS Certified Solutions Architect - Associate (Amazon Web Services) -- 2026 [In Progress]
- Dynatrace Associate (Dynatrace) -- 2026
- Red Hat Certified System Administrator (RHCSA) (Red Hat) -- 2026 [In Progress]

## **EDUCATION**

---

- Bachelor of Engineering in Computer Science - Gyan Ganga Institute Of Technology & Sciences (2019)
- Score: 7.51 CGPA
