

ASHUTOSH SHARMA

SITE RELIABILITY ENGINEER (SRE)

Email: ashusharma181996@gmail.com | Phone: +91-8602228417 | Location: Navi Mumbai, Maharashtra, India

LinkedIn: www.linkedin.com/in/ashutosh-sharma-5034b5145 | GitHub: github.com/Ashu1896

PROFESSIONAL SUMMARY

Reliability-driven Site Reliability Engineer with 5+ years of experience managing large-scale server fleets and cloud infrastructures. Expert in Site Reliability Engineering, observability pipelines (Dynatrace, Datadog, Prometheus, Grafana), setting up custom capacity dashboards, and intelligent alerting to reduce false positives by 65%. Proven success engineering self-healing systems that reduced ticketing by 45% and achieving a 15-minute MTTR under a strict uptime SLA.

TECHNICAL SKILLS

Monitoring & Observability: AWS CloudWatch, Dynatrace, Datadog, Nagios, Prometheus, Grafana, APM, RUM, Synthetic Monitoring

Cloud Architecture & Operations: Cloud Architecture, High Availability Design, Disaster Recovery, Multi-Region Deployments, Hybrid Cloud

Linux System Administration: RHEL 6/7/8/9, Ubuntu 18/20/22, Kernel Tuning, LVM, RAID, systemd, iptables/firewalld, NFS/SAMBA, DNS, DHCP

Automation & Infrastructure as Code: Terraform, Ansible, Bash Scripting, Python, CloudFormation, Jenkins, Git

Security & Compliance Hardening: IAM Policies, PCI DSS, CIS Benchmarks, Security Hardening, SSL/TLS, PAM, Vulnerability Patching, Audit Logging

Databases & Web Middleware: MySQL, RDS (AWS)

PROFESSIONAL EXPERIENCE

Senior Software Engineer

November 2025 - Present

Quality Kiosk Technologies -- Navi Mumbai, India

- Implementing observability solutions using Dynatrace and AWS CloudWatch for real-time application and infrastructure monitoring.
- Collaborating with development teams to integrate monitoring into CI/CD pipelines for shift-left observability.
- Architecting and managing AWS cloud infrastructure including EC2, S3, IAM, CloudWatch, and RDS for enterprise clients.
- Driving automation initiatives using Ansible and Terraform to streamline cloud provisioning and configuration management.

Senior Analyst - Linux & Cloud Infrastructure

March 2022 - August 2025

Capgemini -- Pune, India

- Achieved 15-minute MTTR through proactive monitoring, automated health checks, and rapid incident response workflows.
- Configured intelligent alerting reducing false positives by 65% while maintaining 100% critical incident detection.
- Created Python-based monitoring scripts for anomaly detection, preventing 20+ potential outages monthly.
- Engineered Bash script automating traffic failover between primary and DR sites, reducing RTO from 2 hours to 5 minutes.
- Deployed Dynatrace OneAgent across Linux infrastructure providing real-time visibility into system and application metrics.
- Led migration from Dynatrace to Datadog for 1500+ servers, improving metric granularity and reducing monitoring costs by 40%.
- Created 15+ custom dashboards tracking CPU, memory, disk I/O, and network metrics for capacity planning.
- Performed root cause analysis for performance issues, identifying and resolving bottlenecks improving throughput by 35%.
- Built self-healing scripts for common infrastructure issues, reducing ticket volume by 45% and saving 20 hours weekly.
- Managed AWS cloud resources (EC2, S3, IAM, CloudWatch, RDS) supporting financial services and insurance core systems.

- Administered 2000+ RHEL/Ubuntu production servers (50+ HP-UX, 30+ AIX, 28 Nutanix) achieving 99.95% uptime SLA.
- Led OS migration and upgrade project from RHEL 6 to RHEL 7 for 1000+ servers with zero downtime using Ansible and Bash scripting.

Application Performance Monitoring Analyst

February 2021 - October 2021

Byju's -- Remote

- Monitored application performance and user enrolment processes for a high-traffic educational platform.
- Tracked daily application metrics and user activity patterns using web-based monitoring and APM tools.
- Generated automated HTML reports with student information and academic data, improving stakeholder visibility.

Technical Support Executive - Identity & Access

November 2019 - July 2020

Conneqt Business Solutions (Client: Tata Motors) -- Pune, India

- Managed user access provisioning and identity management through Additas ticketing system.
- Implemented role-based access control policies and coordinated approval workflows with department heads.
- Performed end-to-end user lifecycle management including account creation, modification, and deactivation.

CERTIFICATIONS

- HashiCorp Certified: Terraform Associate (HashiCorp) -- 2024
- ITIL Foundation v4 (AXELOS) -- 2023
- AWS Certified Solutions Architect - Associate (Amazon Web Services) -- 2026 [In Progress]
- Dynatrace Associate (Dynatrace) -- 2026
- Red Hat Certified System Administrator (RHCSA) (Red Hat) -- 2026 [In Progress]

EDUCATION

- Bachelor of Engineering in Computer Science - Gyan Ganga Institute Of Technology & Sciences (2019)
- Score: 7.51 CGPA
